

Seedlings

What you'll need:

Biodegradable pots

Potting mix disk

Native flower seeds

Steps:

- Choose one of the biodegradable pots and one of the potting mix disks
- Put a glove onto your writing hand
- Put the potting mix disk into the pot and pour water on top - the potting mix will grow and get fluffy
- Wait 2 minutes and then add a little more water and mix the potting mix with your gloved finger
- Wait another 2 minutes then poke 1 gloved finger into the middle of the potting mix
- Take the Australian native flower seeds and put them into the hole you just made
- Gently cover the seeds with potting mix
